PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of professional experience building and maintaining production web applications using React.js, TypeScript, Node.js, Express.js, PHP, Laravel, PostgreSQL, and MySQL. Deliver end-to-end features across responsive interfaces, RESTful APIs, backend services, database integration, and testing. Apply cloud computing principles learned through AWS Cloud Practitioner coursework to inform decisions on application security, reliability, scalability, and deployment readiness. Use AI-assisted development tools to accelerate implementation, debugging, and refactoring while maintaining code quality through testing and review. Focused on reliable, maintainable software in Agile teams.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Next.js, Vue.js, Angular, HTML5, CSS3, Sass/SCSS, Tailwind CSS, Redux Toolkit, React Router, Blade
Backend: Node.js, Express.js, PHP, Laravel, RESTful API Development, API Integration, JWT Authentication, Laravel Sanctum
Databases: PostgreSQL, MySQL, SQL, Database Design, Query Optimization, Eloquent ORM
Development Tools: Git, GitHub, GitHub Actions, Postman, Axios, NPM, Vercel, Neon
AI-Assisted Development: Claude Code, GitHub Copilot, OpenAI Codex, Cursor
Software Engineering: Agile, Scrum, CI/CD, API Testing, Debugging, Code Reviews, Responsive Design, Software Development Lifecycle (SDLC)

PROFESSIONAL EXPERIENCE

Full-Stack Developer, Innosoft Ventures | Dec 2023 - Present

- Contribute to the development, maintenance, and continuous enhancement of SmartData, delivering full-stack functionality across multiple application features and modules.
- Develop responsive, interactive frontend interfaces using React.js, TypeScript, JavaScript, and Sass/SCSS, integrating user-facing components with backend services and RESTful APIs.
- Build and maintain backend functionality using Node.js, Express.js, PHP, and Laravel, implementing API endpoints, application logic, data validation, and relational database operations with PostgreSQL and MySQL.
- Work across the full software development lifecycle, including feature implementation, frontend-backend integration, API testing, debugging, troubleshooting, code reviews, and ongoing application improvements.
- Contribute to multiple SmartData modules, including File Manager functionality that supports secure file uploads, file organization, and workflow-based processing.
- Apply cloud computing principles from AWS Cloud Practitioner coursework to inform development decisions on application security, reliability, scalability, and deployment readiness.
- Apply AI-assisted development tools to accelerate coding, support technical problem-solving, streamline refactoring, and improve development efficiency while maintaining code quality through testing and review.

Backend Developer, Enrooting Technologies | Mar 2022 - Nov 2023

- Developed and maintained backend applications and RESTful APIs using Node.js, Express.js, TypeScript, PostgreSQL, and SQL.
- Implemented JWT-based authentication and authorization, request validation, structured error handling, and secure API functionality.
- Designed relational database schemas, optimized SQL queries, and implemented database operations to support application functionality.
- Tested and debugged RESTful APIs using Postman, troubleshooting backend issues and contributing to maintainable, reliable software.

PROJECTS

Expense Tracker Application | React.js, TypeScript, Redux Toolkit, Node.js, Express.js, PostgreSQL

- Developed a full-stack expense tracking application featuring responsive dashboards, financial charts, transaction management, search, and category filtering.
- Implemented frontend state management using Redux Toolkit and integrated secure RESTful APIs with JWT authentication and PostgreSQL persistence.

GitHub: github.com/kamva-hanisi/Expense-Tracker-App | **Live:** kamva-hanisi.github.io/Expense-Tracker-App/

Task Manager Web Application | React.js, Node.js, Vercel Functions, PostgreSQL

- Built a full-stack task management application with a responsive React interface, user authentication, password reset functionality, and task CRUD operations.
- Developed Node.js API functionality with PostgreSQL persistence and integrated frontend and backend services.

GitHub: github.com/kamva-hanisi/Task-Mananger | **Live:** kamva-hanisi.github.io/Task-Mananger/

Forge & Fade | React.js, Sass, PHP, Laravel, Eloquent ORM

- Developed a full-stack barbershop booking application with a responsive React frontend and Laravel RESTful API.
- Implemented appointment availability, booking validation, and customer enquiry functionality.
